

FORKFUL OF FACTS

Finnish Food Industry Statistics 2016

Ruokatieli

FOR THE READER

Forkful of Facts – Food Industry Statistics contains a wide variety of figures concerning Finnish agriculture, covering the entire food chain, from field to fork.

Forkful of Facts presents figures about food chain practices and value-adding factors, which can be utilised to enhance the competitiveness of the Finnish food chain, which relies on responsible practices. The statistics have been divided under headings environment, product safety, nutrition, work and well-being at work, animals and animal well-being, locality and economy. This division follows the seven dimensions of food chain sustainability. Nevertheless, it must be noted that the selected statistics do not measure the level of sustainability, as research on the subject is still at an early stage.

The latest information in this Forkful of Facts is mainly from 2015. We have also included information from earlier years as well as international data for comparison. Some new tables have been introduced this year, particularly ones that describe Finland as an arctic food producing country and comparative figures from the EU.

A paper copy of Forkful of Facts is available in three languages (Finnish, Swedish, English) and it is also available online at www.ruokatieto.fi/tietohaarukka.

TABLE OF CONTENTS

General information		
Mean precipitation 1981–2015	3	Ownership of agricultural and horticultural enterprises
Mean temperatures 1981–2015	3	Agricultural labour force
Weather conditions during the growing season	3	Specialization in agricultural and horticultural enterprises
Day lenght	3	Income of agricultural and horticultural enterprises per production sector
Households by size	4	Other entrepreneurship on agricultural and horticultural enterprises
The population of Finland	4	Use of arable land
The population density of Finland	4	Crop
The average size of a household	4	Agricultural production costs
Gross domestic product	5	Agricultural gross return
Gross value of and value added to production by industry branch 2014	6	Beekeeping figures
Bioeconomy in 2014	7	Profitability coefficient on the Finnish farms 2001–2014
Labour force	8	Entrepreneurial income
Occupational diseases by industry 2013	9	Producer prices
Number of occupational accidents	9	Livestock
Average age and number of agricultural entrepreneurs	9	Average number of animals in farms
Most important reasons for retirement on disability pension among agricultural entrepreneurs	10	Protection of animals inspections based on sample
		Prevention of cruelty to animals inspections in commercial animal deliveries
Agriculture		
Organic production area and number of organic farms	11	Farms receiving animal well-being subsidies
Number of organic producers	11	Implementation of animal welfare on pig and cow farms
Use of arable land on organic farms	12	Responsible production limit values in pork production
Organic production	13	Use of antimicrobial agents in food-producing animals
Market share of organic produce	13	The foodpad dermatitis score that measures the well-being of broiler chickens
Environmental aid	13	Henneries 2015
Volume of pesticides sales	14	Barn types 2015
Pesticide residue control 2015	14	Grazing and time outdoors
Substituting for agricultural entrepreneurs	15	Milking machines 2015
Number of agricultural and horticultural enterprises	15	Average yield per cow and milk contents 2015
Change in number of agricultural and horticultural enterprises	16	

Food		
Food consumption per capita in Finland and in the EU	31	Meat 52
Average daily intake of energy-yielding nutrients and fibre and percentage out of the total energy intake	32	Eggs 52
Most important sources of energy and nutrients	33	Milk products and edible fats 53
Actual vitamin and mineral intake compared to the recommendations	34	Bread grain 53
Finns' daily meals	35	Fish 54
Health behaviour	36	Fish consumption 54
Level of self-sufficiency in food products	37	Vegetables and fruit 55
Share of the economy for food processing in the regions	38	Berries and mushrooms 56
Food manufacturers by sector	39	Game bag 57
Number of employees working in food and drinks industry plants	40	Non-compliant foods 2015 58
Food industry key sectors	41	Causes of non-compliance 2015 59
Import and export of foodstuffs	42	Veterinary medicinal product residues and other substances in live animals and animal products 59
Food exports by country	44	Food control figures 2015 60
Food exports by country and product group 2015	45	Number of recalls 61
The share of food industry's R&D costs	46	Reasons for product withdrawals 2015 61
Consumption expenditure	46	Foodborne and waterborne outbreaks and number of persons affected 2015 61
Food expenditure	47	Foodborne and waterborne outbreaks by disease-causing agent 2015 62
Real price development of food in Finland	47	
Retail prices	48	
The most common value-added tax on food in the EU-countries 2016	49	
Price indexes 2014	50	
Households consumption of food and non-alcoholic beverages	51	Daily Consumer Goods Trade and Institutional Kitchens 63
		Number of shops by shop type 63
		Sales of daily consumer goods by shop type 63
		Number of institutional kitchens by sector 64
		Number of portions prepared in institutional kitchens 64
		Share of organic products in public catering 64
		Frequency of consumption of organic produce by catering providers 64

Explanation of symbols:
 p. = preliminary data

HOUSEHOLDS BY SIZE

in 2014 there were 2 640 499 households

Source: Statistics Finland

The population of Finland in December 2015 was 5 486 616.

Source: Statistics Finland

On the first of January 2016 the population density of Finland was approximately 18.06 people per square kilometer.

In the year 2014 the average size of a household was approximately 2.04 people.

VETERINARY MEDICINAL PRODUCT RESIDUES AND OTHER SUBSTANCES IN LIVE ANIMALS AND ANIMAL PRODUCTS

	EU-27 average		Finland		
	2010	2013	2010	2013	2015
Number of targeted samples	418 081	419 528	4 344	4 341	4 344
Non-compliant samples %	0.33	0.31	0.0	0.00	0.02

Source: EFSA and Finnish Food Safety Authority Evira

Contaminants are prohibited substances, permissible medicinal products and contaminants from the environment. The EU results include all samples examined in the programme, including contaminants from the environment. The results for Finland take into account the residues of prohibited substances and permissible medicinal products but not all results that exceed the limit, such as heavy metals found in game.
